PAPER - 102

Society in India: Structure and Change

Objectives:

It is presumed that student has some familiarity with Indian social by virtue of the fact that he is a member of it and that he has observed and experienced some facts of it. However this familiarity is likely to be superficial selective and rather fragmentary. The course is aimed at rectifying these limitations by presenting a comprehensive, integrated and empirically –based profile of Indian society.

The continuity between the present and the past is an evident feature of Indian society. Though this continuity is reflected ink the structure of the course. The focus is on the contemporary Indian society. It is hoped that the sociological perspective on Indian society presented in this course will also enable students to gain a better understanding of their own situation and region.

Course outline:

Foundations of Sociological Thought

(Questions in this Paper shall be based on Objective Type – OMR Sheet)

Objectives:

Sociology originated as an intellectual response to the crisis confronting the mid nineteenth century European society. Its development over two century since then has been influenced by a variety of socio-economic and political conditions where it has been taught and practiced. It is know established as a multiparadigmatic academic discipline, with its body of theoretical knowledge enriched and its methodological techniques and procedures systemized, Nevertheless, some of its original concerns have persisted and some of its classical theoretical and methodological landmarks are relevant even now.

This paper is intended to familiarize the students with the social, political, economic and intellectual contexts in which sociology emerged as a distinctive discipline. Its objective is to help students gain an understanding of some of the classical contributions in sociology, and their continuing relevance to its contemporary concerns.

Course Outlines:

Unit I:

The Emergence of sociology: History of Social Thought: Enlightenment – The social, economic and political forces: The French and Industrial Revolutions.

Unit II:

Pedagogy:

The uses of techniques and methods have to be understood alongwith the Perspective that governs research. An effort should be made to distinguish between techniques and methods. Moreover, the teachers may convey the Message to the students that the social context of research and its methods is fundamental to their understanding and application.

The purpose of the course is to train students as good research and investigators. For this reason, understanding of social reality, especially the local context, is imperative. Therefore, examples and illustrations may be drawn from local / regional contexts for effective teaching and meaningful learning.

The main efforts may be devoted to making students do exercises in the class and, if possible, in the field. This will also make the course interesting and give students the necessary practice to apply the techniques and methods in the field situations as well as for data analysis.

Students may also be familiarized with published source material especially the census reports. Use of OHP for the reading and interpretation of tables, graphs etc. will be helpful.
